PROFILE SUMMARY

Hi, I'm Thejas B M, a web developer and UI/UX designer with a passion for creating beautiful, functional, and user-centered digital experiences. With 3 years of experience in the field, I am always looking for new and innovative ways to bring my clients' visions to life.

I believe that design is about more than just making things look good – it's about solving problems and crafting intuitive, enjoyable experiences for users. Whether I'm working on a website, mobile app, or other digital product, I bring my commitment to design excellence and user-centered thinking to every project I take on.

Over the past three years, I have worked on multiple large-scale projects, improving performance, accessibility, and interactivity. I specialize in front-end and back-end development, ensuring seamless integration of UI/UX principles into functional and scalable applications. I look forward to the opportunity to bring my skills, experience, and passion to your next project.

WORK EXPERIENCE

CheapToGo

NOV 2024 - Present

Senior Full Stack Web Developer

As a Senior Full Stack Web Developer at CheapToGo, I played a key role in designing, developing, and maintaining the company's web platforms, ensuring seamless user experiences for travel booking and related services. My responsibilities included:

- **Frontend Development:** Built responsive and user-friendly interfaces using React.js, ensuring a smooth booking experience.
- **Backend Development:** Developed and optimized APIs using Node.js, integrating third-party services for flights, hotels, and payments.
- **Database Management:** Designed and maintained databases using MongoDB, improving data efficiency and security.
- **Performance Optimization:** Enhanced website speed, security, and scalability through best practices and modern technologies.
- **Collaboration:** Worked closely with UX/UI designers, project managers, and stakeholders to align development with business goals.
- **Deployment & Maintenance:** Managed cloud infrastructure on Azure automating deployments with CI/CD pipelines.

During my tenure, I contributed significantly to improving website performance, enhancing security, and introducing innovative features that streamlined the booking process, ultimately increasing user engagement and customer satisfaction.
